

*Quercus laevis*  
Turkey Oak  
Deciduous

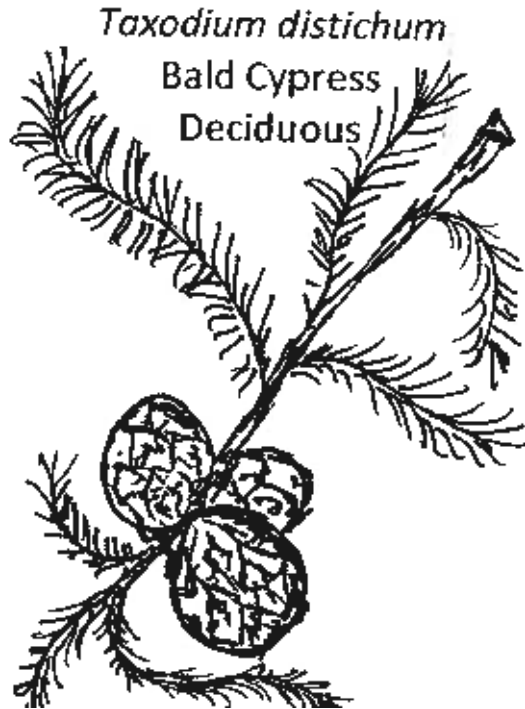

*Quercus virginiana*  
Southern Live Oak  
Evergreen

*Magnolia grandiflora*  
Southern Magnolia  
Evergreen

*Salix nigra*  
Black Willow  
Deciduous

*Taxodium distichum*  
Bald Cypress  
Deciduous

Many different kinds of trees create a rich canopy for the gardens. Trees, like all plants, are producers that make their own food. Most of this process (Photosynthesis) occurs in the leaves themselves. Study them carefully. See if you can find these species in the gardens by examining the leaves. Happy hunting!
